

Answer: b) 60 days

Explanation: There is no limit to the amount of times aluminum can be recycled, making it one of the most recycled products. This allows for a quick return to store shelves.

Answer: b) Light a 100 watt light bulb for four hours

Explanation: Recycling reduces air pollution by 20%, reduces water pollution by 50%, and uses 25-30% less energy than making glass from new materials.

Answer: d) From the tap

Explanation: Drinking from the tap instead of a 12 oz. can or bottle will save 165 new or recycled containers from being produced or used.

Answer: c) 700 years

Explanation: All plastic can be recycled. Some studies show that only 10% of plastic bottles created are recycled, leaving that extra 90% polluting our oceans and taking up space in landfills.
